EVEN ONE LONG-TERM DRINKING WATER ADVISORY IS ONE TOO MANY

For more than eight years, you have helped us pressure the federal government to ensure all First Nations have access to clean drinking water on reserves.

We have delivered thousands of Water Drops created by students to the Prime Minister to remind him of his commitment to end Drinking Water Advisories by 2021.

There has been some progress but there are still dozens of reserves that must boil every drop of water before using it. Even one drinking water advisory is too many. We can continue keeping the pressure on our governments with your help.

THERE ARE FEW THINGS MORE IMPORTANT THAN CLEAN, SAFE WATER.

Young activists can also use this printable Water Drop to draw, write, and colour their own message.
